

Dear Senator:

Do you care about America's veterans? If you do, then I expect you to become a cosponsor and outspoken supporter of S.669, the Veterans Second Amendment Protection Act. The disarmament of our Vets has to stop now.

According to the Congressional Research Service, more than 150,000 military veterans have now been disarmed because of health-related information that is being used to disqualify them.

If our country will use health information to prohibit our military veterans from owning guns, then how many more millions of Americans will be denied the right to purchase firearms now that the ObamaCare legislation is enacted?

I hope you will support a repeal of ObamaCare and cosponsor S. 669, which was introduced by Senator Burr. His bill passed out of committee unanimously. It's now on the calendar. Let's protect our veterans!

Sincerely,
